Spans over uneven ground	Yes	Yes	
Disturbs ground when installed	No	Yes	
Shakes vehicles when crossing over	Yes	No	

FODS mats are 100% recyclable, made in the USA, and can be reused for many years. Reusing FODS reduces the enviromental impact of mining rock.

After more than ten years of service to you; FODS mats are recyclable. Minimise ground erosion by installing FODS above the substructure. Each entrance installed with FODS will save 3 truckloads of rock on installation.

Ideal for construction, airports, government. military, oil and gas, roads and bridges, renewable energy, telecommunications, national parks, storm water, pipeline, utilities, mining, agriculture and more.

FODS TRACKOUT CONTROL

FODS MAT

- Mat size: 3658mm x 2134mm x 95mm (73mm pyramid height)
- Mats are connected together using hardware to achieve the required size to meet local jurisdictions specifications
- Mats weigh approx 195 kg.
- Mats can be anchored to asphalt, concrete, or directly to the dirt substrate
- Mats are made out of HMWPE (High Molecular Weight Polyethylene)
- Mats are FODS Safety Yellow in Color

STABILISED SITE ACCESS POINT

3.7m wide by 2.1 m long of aggregate. The location where SCE is installed must be excavated to a depth of 150mm, lined with a geotextile erosion control fabric with aggregate placed on top.

Individual jurisdictions may have specifications that can increase or decrease depth, width, length, size of aggregate, etc. After SCE removal, topsoil must be added back to disturbed area, graded and re-seeded.
